5.1 Revenue Calculation Formula

Monthly revenue is calculated by summing the contracted project fees of all newly signed client agreements in that calendar month:

$$ ext{Monthly Revenue} = \sum (ext{New Clients Acquired} imes ext{Average Package Price})$$

Lead-to-client conversion efficiency is modeled at approximately 15% overall (57 clients acquired from 370 total leads generated across the year).

6. QUARTERLY SALES AND REVENUE RECONCILIATION

Quarter	Total Leads	Qualified Leads	Proposals Sent	Clients Acquired	Quarterly Revenue (PKR)	Main Sales Focus & Review Objectives
Q1 (Jan–Mar)	67	24	18	10	PKR 1,180,000	Launch direct outreach in Karachi business hubs; establish referral tracking. Review Q1 lead acquisition costs.
Q2 (Apr–Jun)	90	32	26	14	PKR 1,600,000	Intensify LinkedIn networking and SME chamber outreach. Review proposal conversion bottlenecks.
Q3 (Jul–Sep)	97	34	27	14	PKR 1,660,000	Target retail and fashion startups (e.g., boutique sector). Conduct mid-year strategy adjustment.
Q4 (Oct–Dec)	116	40	34	19	PKR 2,110,000	Push year-end business planning packages. Finalize annual review and set 2028 targets.
Total	**370**	**130**	**104**	**57**	**PKR 6,550,000**	**Full annual target successfully reconciled.**

6.1 Seasonal Assumptions
